

EFREN F. RIO

☎ (63) 9063208519
Skype: efren_rio
✉ efren.rio@gmail.com

POSITION APPLYING FOR: _____

OVERVIEW

- My interest are primarily in Web and Windows Applications Development using C#/ASP.NET, Java and PHP followed by developing Windows Applications, using either C++ or C#.
- My projects are currently involved in using C#, ASP.NET, JavaScript, JQuery, Angular, MVC, Web API, MS SQL and MySQL.

QUALIFICATIONS

- Managing and lead teams in development, enabling new skills and technologies, provides motivation and direction
- Practices Agile Development using Scrum
- Extensive background in software development process including coding, testing, debugging and maintenance.
- Designs and Implements flexible solutions to support frequent UI and functionality changes.
- Proficient in network installation, administration, security, support and maintenance.

TECHNICAL SKILLS

- ✓ Tools, Framework and Technologies.
 - C++, C#, VB.NET, Java, Lua, Unity3d
 - ASP.NET, MVC, Razor, Web API, Entity Framework
 - PHP, CodeIgniter, Laravel, Zend, Drupal, Typo3, Magento, Wordpress
 - JavaScript, JQuery, KnockoutJS, CoffeeScript, TypeScript, Angular, VueJS, EmberJS, ReactJS, Jade, HandleBarJS, NodeJS, ExpressJS, Ionic Framework
 - HTML, CSS, Jade
 - Grunt, Gulp, Bower, NPM, Docker
 - Selenium
 - TFS, Git, SVN, CSV, Vault, Source Safe
 - IDE, Visual Studio, NetBeans, Eclipse, Android Studio
 - Android, Ionic Framework
- ✓ Databases
 - MS SQL, MS SQL Reporting Service, MS Analysis Service, OLAP, MySQL, PostgreSQL, MongoDB, Access, IBM DB2.
- ✓ Network Communication.
 - TCP/IP, IPX/SPX, LAN Card, HUB, Switches, Router, LAN Cabling, DSL, Fiber.
- ✓ Web and Application Server.
 - SharePoint, IIS, BizTalk, Apache, Tomcat, IBM Web Sphere,
- ✓ Operating System Platforms.
 - MS Windows, Mac OS, Linux, UNIX and AS/400.

PROFESSIONAL EXPERIENCES

August 2019 – Present

Senior Application Development and Support Engineer

CONDUENT PHILIPPINES

7th Floor, One E-Com Center Building, Mall of Asia Complex, Harbor Dr, Pasay, 1300 Metro Manila, Philippines

Job Role

- Development and maintenance of applications using Microsoft Technologies, Visual Studio, MS SQL.

- Development of applications using Angular for applications migrated and ported from ASP.NET Web Forms to Angular and Restful API

Software Applications

1. StrataCare Portal - Portal Entry Point for all Company Applications
 - Description – Serves as Launcher or entry point for all applications
 - Role - Senior Application Development Engineer
 - Software, Tools and Platform – Windows 11 and Visual Studio
 - Skillset Used - JavaScript, Angular, NodeJS, C#, ASP.NET Web API, MS SQL
2. SmartCoder, Reconsideration – Billing Entry Application
 - Description – Provides Data Entry for all information for Billing
 - Role - Senior Application Development Engineer
 - Software, Tools and Platform – Windows 11 and Visual Studio
 - Skillset Used - JavaScript, C#, ASP.NET, MS SQL
3. User Setup – User Setup Configuration
 - Description – User Data Entry and Management
 - Role - Senior Application Development Engineer
 - Software, Tools and Platform – Windows 11 and Visual Studio
 - Skillset Used - JavaScript, Angular, NodeJS, C#, ASP.NET Web API, MS SQL
4. Team Management – Team Management Configuration
 - Description – Team Data Entry and Management
 - Role - Senior Application Development Engineer
 - Software, Tools and Platform – Windows 11 and Visual Studio
 - Skillset Used - JavaScript, Angular, NodeJS, C#, ASP.NET Web API, MS SQL
5. State Reporting / Reports- Handles Reports and Payment Export
 - Description – Report Generation Tool and Export
 - Role - Senior Application Development Engineer
 - Software, Tools and Platform – Windows 11 and Visual Studio
 - Skillset Used - JavaScript, Active Reports, C#, ASP.NET Web API, MS SQL
6. Batch Printing – Manages the Report Printing Process
 - Description – Printing Services and Print Request Queries
 - Role - Senior Application Development Engineer
 - Software, Tools and Platform – Windows 11 and Visual Studio
 - Skillset Used - JavaScript, C#, ASP.NET Web API, MS SQL
7. Hold Groups – Manages Bills Helds and Priorities
 - Description – Bill Helds Groups and Priorities
 - Role - Senior Application Development Engineer
 - Software, Tools and Platform – Windows 11 and Visual Studio
 - Skillset Used - JavaScript, Active Reports, C#, ASP.NET Web API, MS SQL

January 2019-July 2019

Associate Manager for Application Development

Accenture

Nature of Business: IT BPO

JOB DESCRIPTION

- Design and Lead Implementation of technical architecture for Back End Services using best approach and design practices
- Implement best practices in Angular Front using known techniques and best practices.

- Practices Test Driven Design and Service Base Architecture

PROJECT HIGHLIGHTS AND ACHIEVEMENTS

1. Software Applications
1. SEED - Work Force Management Application
 - Description – Management Software for Employee's Data and other Admin Services
 - Role – Associate Manager for Senior Full Stack Development
 - Software and Platform – Windows 10, Visual Studio
 - Skill Set used – JavaScript, Angular, C# ASP.NET Web API
 - Skill Set used – JavaScript, NodeJS.

February 2018-December 2018

Senior Full Stack Developer

Firstmac Operation Center Pty. Ltd.

Nature of Business: IT BPO

JOB DESCRIPTION

- Develop and maintain software applications using NodeJS and Angular
- Manage build deployment to Jenkins and AWS Cloud test environment
- Develops and maintains AWS Lambda and Reactor for API's

PROJECT HIGHLIGHTS AND ACHIEVEMENTS

2. Software Applications
 2. CRUMBS-CRM Application
 - Description – Customer Relationship Management System
 - Role – Senior Full Stack Developer
 - Software and Platform – Windows 10, Visual Studio Code
 - Skill Set used – JavaScript, Angular, NodeJS
 3. Client API – Service API
 - Description – API used by apps and other API
 - Role – Senior Full Stack Developer
 - Software and Platform – Windows 10, Visual Studio Code
 - Skill Set used – JavaScript, Angular, NodeJS
4. Server Deployment and Engineering
 1. Continuous Integration and Deployment
 - Description – Jenkins, Docker and AWS Builds Configuration and Testing
 - Role – Senior Engineer
 - Software and Platform – Windows 10, Linux, AWS
 - Skill Set used – JavaScript, NodeJS.

October 2017-January 31, 2018

AngularJS Lead Developer/ Senior AngularJS Developer

RCG IT Global Services Inc.

Nature of Business: IT BPO

Reason For Leaving : Job security instability due to fixed budget project, client based employment

JOB DESCRIPTION

- Develop and maintain software applications using NodeJS and Angular
- Create unit tests for AngularJS Application and NodeJS API
- Manage build deployment to Jenkins and AWS Cloud test environment
- Develops and maintains Application and API Docker Container for AWS deployment

PROJECT HIGHLIGHTS AND ACHIEVEMENTS

1. Software Applications
 1. Disney Membership Online Booking
 - Description – Membership Booking for Disney Vacation Club Products
 - Role – Senior and Lead Developer
 - Software and Platform – Windows 7, Visual Studio Code
 - Skill Set used – JavaScript, AngularJS, NodeJS
 - The Project Involved Development of Web Application for Disney Vacation Club.
2. Server Deployment and Engineering
 2. Continuous Integration and Deployment
 - Description – Jenkins, Docker and AWS Builds Configuration and Testing
 - Role – Senior Engineer
 - Software and Platform – Windows 7, Ubuntu, AWS

- Skill Set used – JavaScript, AngularJS, NodeJS
- The Project Involved in the testing and deployment of application using containers from Jenkins to Amazon Web Services Cloud.

November 2016-
September 2017

Team Lead Application Developer

D.M.Consunji Inc.

Nature of Business: Engineering, Contracting, Mining and Power Generation

JOB DESCRIPTION

- Manage team of developers, QA and support staff for MIS
- Software Designing and creating technical specification
- Performs task planning and scrum meeting
- Provide mentoring and coaching for the team
- Development and coding of Application and API
- Manage build deployment to Microsoft Servers
- Conducts product demo to owners

PROJECT HIGHLIGHTS AND ACHIEVEMENTS

1. Software Applications
 1. HRMIS
 - Description – Human Resource Management Information System
 - Role – Team Lead, Software Architect and Project Management
 - Software and Platform – Windows 10, MS SQL, Visual Studio
 - Skill Set used – C#, ASP.NET, Web API, EF, MS SQL, AngularJS, JavaScript, HTML, CSS, Bootstrap
 - The Project Involved Development of Web Application for Managing Recruitment, Compensation and Benefits.
 2. Bug Tracker
 - Description – Bug tracking System using Mantis Bug Tracker
 - Role – System Administration
 - Software and Platform – Windows 2008 R2, My SQL
 - Skill Set used – PHP, MySQL
 - The Project Involved Installation and customization of MantisBT

August 2016- November
2016

Senior Software Developer

Alivate Incorporated

Nature of Business: Application development and support, business process outsourcing, help desk

JOB DESCRIPTION

- Development and coding of Application and API using AngularJS and ASP.NET WebAPI
- Development and coding of Mobile version of selected application using Ionic Framework
- Manage build deployment to Microsoft Servers

PROJECT HIGHLIGHTS AND ACHIEVEMENTS

1. Software Applications
 1. Injury Connect
 - Description – Health Management Application For Injured Patients
 - Role – Software Architect
 - Software and Platform – Windows 10, MS SQL, Visual Studio
 - Skill Set used – C#, ASP.NET, Web API, EF, MS SQL, AngularJS, JavaScript, HTML, CSS, Bootstrap
 - The Project Involved Development of Web Application for Hospitals and Clinics for Managing Injured Patients.
 2. Simon Diary
 - Description – School Diary Application
 - Role – Software Architect
 - Software and Platform – Windows 10, MS SQL, Visual Studio
 - Skill Set used – C#, ASP.NET, Web API, MS SQL, AngularJS, JavaScript, Ionic Framework, Bootstrap
 - The Project Involved Development of Mobile for School Students Library.

2016-2016

Senior Software Developer

	<u>Area Ten Pty. Limited</u>
	Nature of Business: Application development and support, business process outsourcing, help desk
	<u>JOB DESCRIPTION</u>
	• Development and coding of Application solutions and tools for SEO requirements • Management of Linux Servers in Cloud
	<u>PROJECT HIGHLIGHTS AND ACHIEVEMENTS</u>
	1. Software Applications 1. SEO and Google Analytics • Description – Search Engine Optimization, Chat API and Analytics • Role – Senior Software Developer • Duration – April 22, 2016 • Software and Platform – Windows 10/7, My SQL, Visual Studio, NetBeans • Skill Set used – C#, PHP, WinForms, My SQL, CodeIgniter, Google Analytics, LiveChat API. • The Project Involved Development of Google Analytics, Third Party API for SEO applications.
2016-2016	<u>Senior .NET Developer</u>
	<u>BIKO Technologies Pty. Limited</u>
	Nature of Business: Application development and support, business process outsourcing, help desk
	<u>JOB DESCRIPTION</u>
	• Maintains and resolve issues with the Booking Web Applications • Development and implementation of AngularJS integration in ASP.NET WebForms • Development and coding of Mobile version of application using Ionic Framework
	<u>PROJECT HIGHLIGHTS AND ACHIEVEMENTS</u>
	1. Software Applications 1. Hotel Booking and Reservation • Description – Hotel Booking and Reservation • Role – Senior Software Engineer • Software and Platform – Windows 10, Android, MS SQL, Visual Studio • Skill Set used – C#, VB.NET, ASP.NET, Web Services, Web API, MS SQL, AngularJS, and Ionic Framework. • The Project Involved Development of Hotel Reservation and Booking using API, WebForms, MVC, AngularJS and Ionic Frameworks.
2016-2016	<u>Software Developer</u>
	<u>Your Virtual Workers Philippines</u>
	Nature of Business: Application development and support, business process outsourcing, help desk
	<u>JOB DESCRIPTION</u>
	• Development and coding of Compensation Web Application • Development and implementation using CoffeeScript, ASP.NET MVC and Dapper
	<u>PROJECT HIGHLIGHTS AND ACHIEVEMENTS</u>
	1. Software Applications 1. Compensation and Benefits • Description – Compensation and Benefits Application • Role – Software Developer • Software and Platform – Windows7, MS SQL, Visual Studio • Skill Set used – C#, VB.NET, ASP.NET, Web API, MS SQL, KnockoutJS, CoffeeScript. • The Project Involved Development of Web Application for Compensation and Benefits using API, Web Forms and MVVM thru KnockoutJS.
September 8, 2015 – December 30, 2015	<u>Team Lead Developer</u>
	<u>Paul Lomax Software Incorporated</u>
	Nature of Business: Application development and support, business process outsourcing, help desk
	<u>JOB DESCRIPTION</u>

- Managers team of developers
- Development and coding of CodeGen Web Application
- Performs technical designing and specification base on client requirements
- Performs task planning and scrum meeting
- Manage build deployment to test servers

PROJECT HIGHLIGHTS AND ACHIEVEMENTS

1. Software Applications

1. Code Generator

- Description – Code Generator
- Role – Team Lead Developer
- Software and Platform – Windows7, EF, MS SQL, Visual Studio
- Skill Set used – C#, VB.NET, ASP Classic, ASP.NET, PHP, MVC, Web API, MS SQL, MySQL, AngularJS, and Android.
- The Project Involved Development of Website and Mobile Apps for Site Reselling and Subscriptions and providing API for Developers.

February 12, 2013 –
October 2, 2015

Senior Programmer

CAI STA Philippines Inc.

Nature of Business: Application development and support, business process outsourcing, help desk

JOB DESCRIPTION

- Development and coding of Analog Engineering Web Tool Applications
- Performs task breakdown and conversion to stories
- Maintains and resolve issue for Web Applications

PROJECT HIGHLIGHTS AND ACHIEVEMENTS

1. Software Applications

1. Signal Chain Designer

- Client – Analog Devices Inc. – www.analog.com
- Description – Electronic Schematic Block Design Tools
- Role – Senior Programmer
- Duration – February 2013 to Present
- Software and Platform – Windows7, MS SQL, Visual Studio
- Skill Set used – C#, ASP.NET, MVC, Web API, MS SQL, EmberJS, HandleBarJS, RequireJS.
- The project involved development of Engineering Design Tools To Connect or Group Electronic Schematic Blocks

2. Signal Chain Designer Tester

- Client – Analog Devices Inc. – www.analog.com
- Description – Test Automation Tools for Signal Chain Designer
- Role – Senior Programmer
- Duration – February 2013 to Present
- Software and Platform – Windows7, MS SQL, Visual Studio
- Skill Set used – C#, ASP.NET, MVC, Web API, MS SQL, EmberJS, HandleBarJs, RequireJs, Selenium Test Automation Tool and Jasmine Unit Test Tools.
- The project involved development of test automation tools to test scenarios for Signal Chain Designer

3. Schematic Designer

- Client – Analog Devices Inc. – www.analog.com
- Description – Electronic Schematic Designer Tools
- Role – Senior Programmer
- Duration – February 2013 to Present
- Software and Platform – Windows7, MS SQL, Visual Studio
- Skill Set used – C#, ASP.NET, MVC, Web API, MS SQL, EmberJS, HandleBarJs, RequireJs.
- The project involved development of tools used for Electronic Schematic Design

4. Filter Wizard

- Client – Analog Devices Inc. – www.analog.com
- Description – Electronic Signal Filter tools
- Role – Senior Programmer
- Duration – February 2013 to Present

- Software and Platform – Windows7, MS SQL, Visual Studio
 - Skill Set used – C#, ASP.NET, MVC, Web API, MS SQL, EmberJS, HandleBarJs, RequireJs.
 - The project involved development of tools used for Electronic Signal Filter involving Low Pass Filter, High Pass Filter and Band Pass Filters
5. Photo Diode Wizard
 - Client – Analog Devices Inc. – www.analog.com
 - Description – Electronic Designer Tools for Photo Diode
 - Role – Senior Programmer
 - Duration – February 2013 to Present
 - Software and Platform – Windows7, MS SQL, Visual Studio
 - Skill Set used – C#, ASP.NET, MVC, Web API, MS SQL, EmberJS, HandleBarJs, RequireJs.
 - The project involved development of tools used for Electronic which uses Photo Diode
 6. Parametric Search
 - Client – Analog Devices Inc. – www.analog.com
 - Description – Library of Electronic Products Tools
 - Role – Senior Programmer
 - Duration – February 2013 to Present
 - Software and Platform – Windows7, MS SQL, Visual Studio
 - Skill Set used – C#, ASP.NET, MVC, Web API, MS SQL, EmberJS, HandleBarJs, RequireJs, Selenium Test Automation Tool and Jasmine Unit Test Tools.
 - The project involved development of tools used for searching Analog Products.

April 23, 2012 – January
25, 2013

Senior ASP.NET Developer

SkyServices Inc.

Nature of Business: ECommerce Company that specializes in the global money management and transfer service for consumers and merchants worldwide.

JOB DESCRIPTION

- Development and coding of Point of Sale Application and APIs
- Communicates with the API vendor to Service API requirements
- Maintains and resolve issue for Web Applications

PROJECT HIGHLIGHTS AND ACHIEVEMENTS

1. Software Applications
 1. BDO Mastercard Payment
 - Role – Senior ASP.NET Developer
 - Description – SkyPay Payment Module
 - Duration – April 2012 to May 2012
 - Software and Platform – Windows7, MySQL, Visual Studio
 - Skill Set used – C#, ASP.NET, MVC, Web API, PHP, EF, MySQL HTML, XML, CSS ,AJAX, JavaScript, JQuery.
 - The project involved development of payment module using Credit Card.
 2. Megalink Check Digit Validation
 - Role – Senior ASP.NET Developer
 - Description – Bill Collection Account Number Validation
 - Duration – May 2012
 - Software and Platform – Windows7, EF, MySQL, Visual Studio 2010.
 - Skill Set used –C#, SQL.
 - The project involved developing digit validation for billers
 3. Bill Collection File Transfer
 - Role – Senior ASP.NET Developer
 - Description – Bill Collection FTP and Emailer Application
 - Duration – May 2012
 - Software and Platform – Windows7, EF, MySQL, Visual Studio 2010.
 - Skill Set used –C#, MVC, Web API, SQL.
 - The project involved developing File Transfer and Emailer Windows Application for the Megalink Bill Collection
 4. Smart Money Payment
 - Role – Senior ASP.NET Developer
 - Description – Smart Money Payment Module

- Duration – June 2012
 - Software and Platform – Windows7, EF, MySQL, Visual Studio 2010.
 - Skill Set used –C#, SOAP, XML, Web Service,SQL.
 - The project involved developing module to support Smart Money Transfer Payment System.
5. SMS Web API
 - Role – Senior ASP.NET Developer
 - Description – Short Messaging System API
 - Duration – July 2012 – August 2012
 - Software and Platform – Windows7, EF , MySQL, Visual Studio 2010.
 - Skill Set used –C#, MVC, Web API, SQL.
 - The project involved developing Web API for the SkyyServices Application to use for Short Messaging, alerts and other messaging thru mobile phones.
 6. Printer API
 - Role – Senior ASP.NET Developer
 - Description – Short Messaging System API
 - Duration – August 2012
 - Software and Platform – Windows7, EF, MySQL, Visual Studio 2010.
 - Skill Set used –C#, SQL.
 - The project involved developing Class library for Printer API.
 7. Sun Gold Mine
 - Role – Senior ASP.NET Developer
 - Description – Sun Prepaid SIM Loading API
 - Duration – August 2012
 - Software and Platform – Windows7, EF, MySQL, Visual Studio 2010.
 - Skill Set used –C#, Web Services, SOAP, and SQL.
 - The project involved developing module Sun Cellular Mobile Phone Prepaid Loading.

February 27, 2012 – May 10, 2012

Senior Game Developer/Team Lead

Hercules Group Asia Corp ☎ +(63) 2- 5718184
 Unit 201 AIC-Burgundy Empire Tower
 ADB Avenue, Ortigas Center
 Pasig City, Philippines 1605

➤ Nature of Business: Software Consultancy

JOB DESCRIPTION

- Development and coding of portal and events websites using CMS frameworks
- Development of Drupal Modules
- Theme customization for Drupal Themes.

PROJECT HIGHLIGHTS AND ACHIEVEMENTS

1. Software Applications

1. Mega Events

- Project Name - [Clean Air Mega Events](#)
- Client - Clean Air Initiative for Asian Cities
- Duration - May 2010 to June 2010
- Software and Platform - Linux, Apache, MySQL.
- Skill Set used - HTML, DOM, XML, CSS, RSS, AJAX, PHP, Drupal, JavaScript, JQuery and SQL.
 - The project involved development of a Mega Events website for Clean Air Initiative

2. BAQ 2010

- Project Name – [BAQ 2010](#)
- Client - Clean Air Initiative for Asian Cities
- Duration – May 2010 to June 2012
- Software and Platform - Linux, Apache, MySQL.
- Skill Set used - HTML, DOM, XML, CSS, RSS, AJAX, PHP, Drupal, JavaScript, JQuery and SQL.

- The project involved development of a BAQ 2010 website
- 3. Knowledge Air Portal
 - Project Name - [Knowledge Air Portal](#)
 - Client Clean - Air Initiative for Asian Cities
 - Duration - July 1, 2009 to September 2010
 - Software and Platform - Linux, Apache, MySQL.
 - Skill Set used - HTML, DOM, XML, CSS, RSS, AJAX, PHP, Drupal, JavaScript, JQuery and SQL.
 - The project involved development of a Web Portal for CAI-ASIA.
- 4. CitiesACT
 - Project Name - [CitiesACT](#)
 - Online Portal for Air Quality, Climate Change & Energy, and Transport
 - Software and Platform - Windows Vista, Visual Studio 2008, IIS.
 - Skill Set used - HTML, CSS, JavaScript, AJAX, C#, ASP.NET.
 - The project involved maintenance and enhancement of website portal for providing information and analysis of clean air data for the Asian countries
- 5. Cities For Clear Air
 - Project Name - [Cities For Clean Air](#)
 - Client Clean Air Initiative for Asian Cities
 - Software and Platform - Windows Vista, Unix, Visual Studio 2008, Unix, Apache.
 - Skill Set used - HTML, CSS, AJAX, PHP, and JavaScript.
 - The project involved maintenance and enhancement of website profile for Cities For Clean Air Organization.

October 8, 2007 – June 18, 2009 **Senior Software Engineer**

Lawson Philippines Solutions and Service Center, Inc. ☎ + (63) 2-860-8000
 9/F Net2 Center Building 28th Street cor 3rd Avenue Crescent Park West, Bonifacio Global City 1134

JOB DESCRIPTION

- Development and maintenance of Lawson Core Environment Systems
- Performs Scrum meeting.
- Communicates with third party counter parts for issues and solutions

PROJECT HIGHLIGHTS AND ACHIEVEMENTS

1. Software Applications
 1. Language Translation Tools
 - Project Name – Langdef (Language Definition Utility)
 - Role – Senior Software Engineer
 - Software and Platform – Windows 2003 NET Server, AIX, IBM iSeries, Solaris
 - Skill Set used – C/C++
 - The project involved support, maintenance and update for the Language Translation Utility Programs and Modules
 2. Lawson Unix Emulator for Windows
 - Project Name – LauntDll
 - Role – Senior Software Engineer
 - Software and Platform – Windows 2003 NET Server, AIX, IBM iSeries, Solaris
 - Skill Set used – C/C++
 - The project involved support, maintenance and update of the Unix Emulator for Windows NT for the Lawson Applications
 3. Windows Specific Services
 - Project Name – LaServ (Lawson Windows Services)
 - Role – Senior Software Engineer
 - Software and Platform – Windows 2003 NET Server, AIX, IBM iSeries, Solaris
 - Skill Set used – C/C++
 - The project involved support, maintenance and update of the Lawson Services for Windows NT for Lawson Services
 4. Lawson Presentation Manager
 - Project Name – LAPM (Lawson Presentation Manager)
 - Role – Senior Software Engineer
 - Software and Platform – Windows 2003 NET Server, AIX, IBM iSeries, Solaris

- Skill Set used – C/C++
 - The project involved support, maintenance and update of the Lawson Presentation Manager which executes the User Interfaces Lawson Application
5. Lawson Interface Desktop
- Project Name – LID (Lawson Interface Desktop)
 - Role – Senior Software Engineer
 - Software and Platform – Windows 2003 NET Server, AIX, IBM iSeries, Solaris
 - Skill Set used – C/C++, MFC
 - The project involved support, maintenance and update of the Lawson Interface Desktop

June 17, 2005 – October 5, 2007

Senior Software Developer

Emerson Process Management – Fisher Rosemount Philippine Branch ☎ +(63) 2-702-1000
 42/F One San Miguel Bldg. San Miguel Ave. cor. Shaw Blvd. Pasig City,
 Metro Manila, Philippines
<http://www.emersonprocess.com>

➤ Nature of Business: Power Generation and Water/ Waste Water Treatment Industries

JOB DESCRIPTION

- Development and coding of Emerson Software Solutions

PROJECT HIGHLIGHTS AND ACHIEVEMENTS

1. Software Applications

1. Historian Excel Add-In

- Project Name – Historian Add-In
- Duration – September 2006- October 2006
- Role – Senior Software Developer
- Software and Platform – Windows XP, MS Excel, Visual Basic For Application
- Skill Set used – Visual Basic For Application, OLEDB, ODBC
- The project involved development of an Excel Add-In for retrieving Ovation Historian Data. The application is mainly for offline users of Ovation wherein the users can view point histories without going to the Ovation Application.

2. Ovation Console

- Project Name – OvHConsole
- Duration – July 2005-January 2006
- Role – Senior Software Developer
- Software and Platform – Windows XP, Visual C++
- Skill Set used – Visual C++, MFC
- The project involved development of a Graphical Interface for the Ovation Process Historian Server for testing SQL Queries and other Ovation commands. The application is also designed as a compiler which a script can be test and be used by the Ovation for batch programs.

3. LAB Data

- Project Name – OvHLabData
- Duration – February 2006- May 2006
- Role – Senior Software Developer
